

Create More Value from Your RETIRED ELECTRONIC ASSETS

Secure, responsible and tailored solutions for organisations
managing end-of-life and soon-to-be-retired electronic equipment

TAKE-BACK SOLUTIONS FOR ORGANISATIONS

Your Retired and Unwanted Electronic Assets Are More Valuable Than You Think

Many organisations are focused on improving their Environmental, Social and Governance (ESG) performance, strengthening stakeholder relationships and delivering better customer outcomes. Yet for many businesses, retired and end-of-life electronic equipment remains an overlooked opportunity.

A well-designed electronic and IT recycling program can do far more than divert unwanted technology from landfill. It can help your organisation:

These programs, when smartly implemented, can also create meaningful value for your customers, employees and communities.

From ongoing collection services to employee engagement initiatives and customer-facing take-back/recycling programs, ANZRP helps organisations design and deliver solutions that align with your business objectives, customer needs and sustainability goals. The result is a practical, trusted and scalable program that transforms end-of-life technology into lasting business, environmental and social value.

The organisations that go further, designing **structured and robust programs**, unlock far greater value, for themselves, their employees and if well communicated it can also enhance their customers brand perceptions.

THE CHALLENGE?

Running a successful electronic end of life program can be **operationally complex**.

That's where **ANZRP** comes in.

Why Recycling and Product Life Cycle Responsibility Matters

Recycling and product stewardship programs are not just about meeting minimum business requirements or services — it's about **how your organisation shows leadership and capitalises on the opportunity** that helps you maximise the outcomes, whilst fulfilling your organisation's sustainability and governance criteria.

Well-designed asset management, recycling and life cycle management programs help businesses:

ANZRP delivers programs that create measurable value while upholding the highest standards of compliance. This value can be realised in a range of ways including financial benefits, support for worthwhile charities, initiatives that help bridge the digital divide and measurable environmental outcomes. These outcomes can form compelling ESG stories that demonstrate your organisation's impact and can be highlighted in sustainability and ESG reporting.

What products do we accept?

(National Television and Computer Recycling Scheme (NTCRS) products

Small household e-products

Reuse and Recycling Programs — What's Really Involved

A successful recycling program involves far more than placing a collection box, transporting e-waste and engaging a qualified recycler.

Behind the scenes, it requires specialist capability across:

Recycler selection and oversight

Working with certified recyclers and reuse providers and managing performance, capacity, risk and importantly, circular economy outcomes.

Collection design and setup

Designing systems that work for your business.

Logistics and transport management

Ensuring products move efficiently, safely and cost effectively.

Traceability and assurance

Verifying where materials go and how they are processed — essential for ESG reporting and mitigating risk.

Performance and Reporting

Meeting customer commitments with confidence, accuracy and transparency.

The expertise required is not a problem —
when it's managed by the right partner.

How ANZRP Supports Your Organisation

ANZRP partners with organisations to design, deliver and manage **tailored recycling and reuse solutions** that fit your business, rather than a one-size-fits-all approach.

Our support includes:

Strategically Designed Programs

We work with you to develop programs aligned to:

- your product mix
- your employees needs
- your brand and ESG objectives

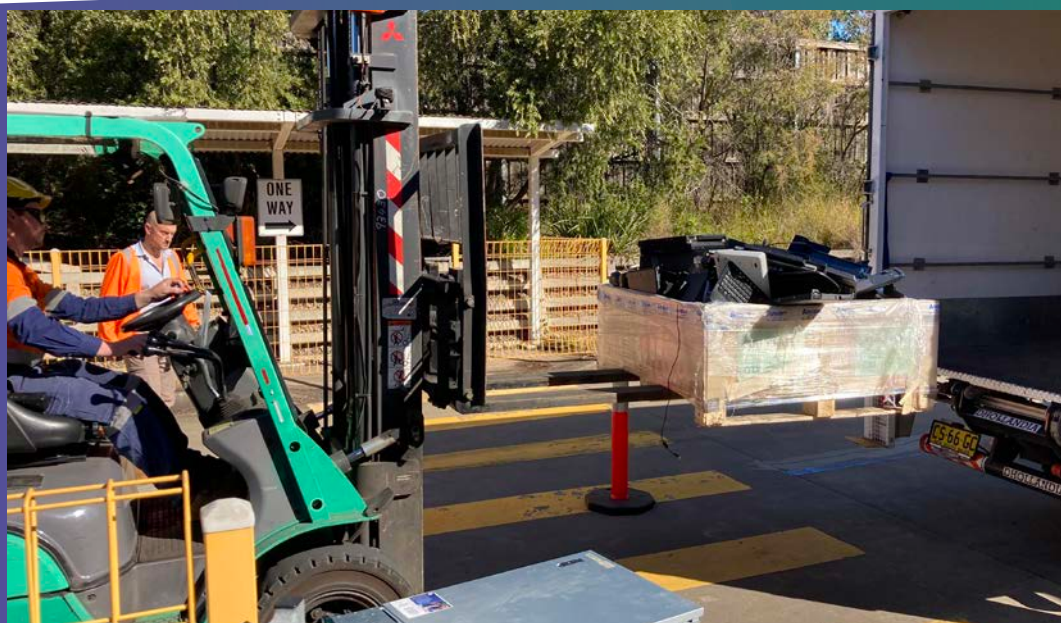

End-to-End Operational Management

ANZRP manages the complexity from end-to-end so you don't have to — from taking the bookings, organising collection and logistics through to recycler and reuse partner engagement, process oversight, managing enquiries and reporting.

Scalable, Future-Ready Solutions

As your business grows or regulations evolve, our programs grow with you.

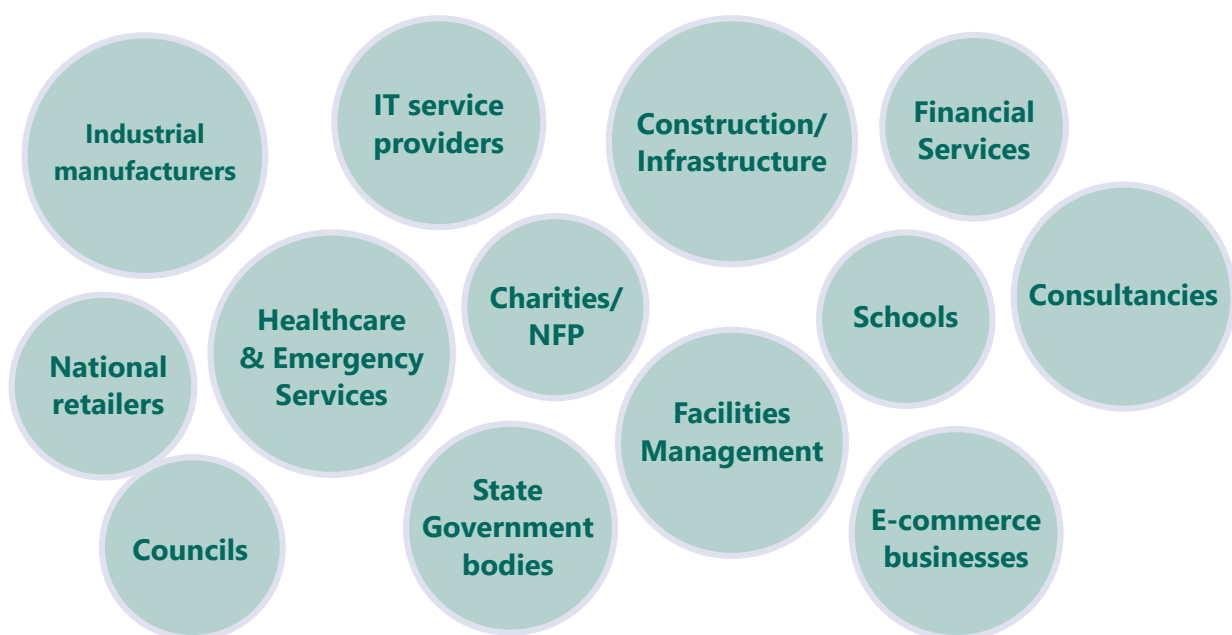

Who We Work With

ANZRP works with leading brands and companies who understand that **good stewardship is good business.**

We provide take-back services to businesses in the following industries:

And many others who have successfully integrated branded take-back and tailored stewardship programs into their business models.

Members who operate successful take-back programs include:

Canon

KONICA MINOLTA

officeworks

These organisations demonstrate what “good” looks like:

- Programs that operate reliably at scale
- Clear, auditable outcomes
- Strong alignment between compliance, sustainability and brand reputation

Our Approach

ANZRP’s approach is built on partnership and trust.

We don’t offer one size fits all solutions.

We take the time to understand your organisation, then apply proven stewardship expertise to design programs that work in the real world.

Our role is to:

Reduce risk

Simplify complexity

Deliver practical outcomes

Deliver environmental
benefits

Help your organisation extract **real**
value from stewardship investment

A QUESTION WORTH ASKING

Are you getting the full value from your unwanted, soon to be retired and end-of-life electronic assets?

What would that be worth to your organisation to realise these benefits and have ANZRP take care of the operational complexity?

Next Step

Talk to ANZRP about how a tailored program or service could support your organisation's compliance, risk profile, sustainability goals and commercial growth.
